tube and fitting

# Dunamis™ Series

Catalogue 2023

# PIR Motion Sensor LED TUBE

Our manual adjustable PIR motion sensor tube is the first in the LED market to allow end users to adjust the shut off time, and the brightness of the tube. It can help save 70% more electricity over traditional LED tubes and 200% more electricity over fluorescent tubes. Suitable for a wide range of venues such as parking garages, warehouses, offices, and factories. Reducing your energy consumption and saving money is now a simple matter.

# PIR Motion Sensor LED TUBE

- ① TIME: When user is away from detection zone, light tube will stay on based on the set time. (5S, 30S, 1M, 3M, 5M, 10M, 20M, 30M, 60M).
  - ② LUX: When user is away from detection zone, the power consumption of the tube will be reduced to the set amount. (0-OFF, 10%, 20%, 30%, 40%).
  - ③ LED Tube's end cap is rotatable 90° clockwise and counter clockwise. This can accurately position the tube to the direction of the sensing and lighting area.
- By installing an optional photocell (day light harvest sensor) it instructs the tube to turn only when the ambient environment is dark. This helps to further save energy by harvesting outside lighting.
  - This sensor tube is designed to reduce as much power usage as possible by allowing user to set different power consumption base on individual usage scenario. The cost of stocking Josgood's PIR sensor tube compare to the traditional pre-programmed sensor LED tube is that one item accommodates all the consumer's need.

# Microwave Sensor LED TUBE

- ① TIME: When user is away from detection zone, light tube will stay on based on the set time. (5S, 30S, 1M, 3M, 5M, 10M, 20M, 30M, 60M).
- ② LUX: When user is away from detection zone, the power consumption of the tube will be reduced to the set amount. (0%-OFF, 10%, 20%, 30%, 40%).
- ③ LED Tube's end cap is rotatable 90° clockwise and counter clockwise. This can accurately position the tube to the direction of the sensing and lighting area.
- ④ Utilizing the Doppler principle, radar signal is emitted and received. The sensor intelligently monitors the surrounding environment to detect if there are movement within the detection zone. Once triggered by movement the lamp will light on. After periods of undetected movement the lamp will behave according to user settings and go into power saving mode.
- ⑤ Maximum sensing distance : upto 10 meters.
  - By installing an optional photocell (day light harvest sensor), it instructs the tube to turn on only when the ambient environment is dark. This helps to further save energy by harvesting outside lighting.
  - This sensor tube is designed to reduce as much power usage as possible by allowing user to set different power consumption base on individual usage scenario. The cost of stocking our microwave sensor tube compare to the traditional pre-programmed sensor LED tube is that one item accommodates all the consumer's need.

## Product Introduction 产品介绍

Dunamis LED T5 tube is an economical and high quality LED lamp with an aesthetic exterior. With a smooth lighting effect, the LED tube is installed widely in both commercial and residential projects as the main lighting. It replaces conventional CFLs tubes to achieve a greater cost savings of almost 50% in electricity used. Being easy to install, it has become the mainstay of most establishments and homes. Using high quality LED chipset and driver, the product provides a strong assurance to users. Also, each LED tube comes with a pair of metal brackets and a connector for your convenience in installation. A true Singapore brand product.

## Features 产品特点

- Professional Optical Design, no visible dark spots on lamp and wall surface, smooth and comfortable light effect;
- High CRI, which is close to natural light;
- Easy connection and Quick start with strong tolerance for variation in input current or voltage;
- The useful life can be 20,000 hours; Lifespan is 10 times longer than CFL;
- Strong heat dissipation achieved with advanced heat sink design and good aluminium.

**Product Introduction** 产品介绍

Dunamis LED T5 tube (Non Integrated) is a premium LED tube with an aesthetic exterior. It focused on giving user the same ease of installing and maintaining the LED tube as to a T5 fluorescent tube. It does not require any external driver. Further, the LED tubes' length is made to fit existing T5 tube holder. A 18w DLT5 premium replaces 36w fluorescent a the same brightness, resulting in 50% electrical cost savings. With 8 – 12 hours of operation, the expected break-even can be between 6 – 11 months. The high power efficiency and ease of maintenance makes it a top consideration for many institutions and residential projects. Lastly, strong assurance is also created by using only high grade Taiwan or Japan LED chipset and driver.

**Features** 产品特点

- Professional Optical Design, no visible dark spots on lamp, smooth and comfortable light effect;
- Does not need external driver, making installation and future maintenance efforts simple;
- Connects directly to 230v AC;
- The useful life can be 40,000 hours; Lifespan is 20 times longer than CFL;
- Strong heat dissipation achieved with advanced and high quality aluminium heat sink design.

# Specification

**Model : EM-T8-F24-1500**

## 1. Feature

- (1) Environmental: Efficiently save energy which can save 70% energy than fluorescent tube;
- (2) High Quality Materials: imported chips, high quality PC diffuser, and pure aluminum;
- (3) Without thermal radiation, stable, long life span, modern design;
- (4) Fast response, non-flickering, low glare;
- (5) High CRI, show what the things really are.

<b>Dimension</b>	1499mm±1mm
<b>Weight</b>	255g
<b>SCDM</b>	≤7dB
<b>Insulation Resistance</b>	> 4MΩ ( 500V DC )

## 4. Dimension (Unit: mm)

## 5. Installation

Please according to following properly installed :

### ■IMPORTANT

The units should not be used in areas with limited ventilation or high-ambient temperatures. Installation should be done by a qualified electrician.

### ■WARNING

Before installation or maintenance, please make sure the power is turned off. Lamp installation must be installed with bracket firmly to prevent falling.

## For T8 LED Tube-Waterproof light

A

With Metal Reflector Product Specification

### Product description:

**Housing** : RAL7035 light grey polycarbonate; (ABS for option)

**Diffuser** : polycarbonate, prismatic inside for better light control;(PMMA for option)

**Reflector** : High quality iron sheet with white power coating

**Lampholder** : T8-G13,

**Terminal block** : 3poles screw type, or 3poles screwless type;

**Clip** : Polycarbonate clips or Stainless clips

**Mounting bracket** : Stainless brackets;

**Installation** : Easy and quick to install under ceiling or on surface

**Hanger** : Plastic gear tray holder connected to the housing for easy maintenance

**Accessory bag** : PG13.5 cable gland, expansion pipe and screws

**Applications** : Approved for indoor use or outdoor use which need waterproof, dustproof and moistureproof

**Friendly reminder** : 1) can not be installed on surfaces subject to strong vibrations;

2)when using PC diffuser, don't use moderately to strong alkaline or acidic material or solvents or cleaning agents which attack PC material

3)special enviroment using, pls contact us

### 【Kindly Reminder】

Thank you very much for purchasing our products. In order to make sure that you can fully understand the product and use it correctly and safely, please be sure to read this manual carefully. Please keep this manual for future reference. This product is guaranteed for two years from the date of purchase.

### 【Attention】

- ① In order to ensure the correct use of the product, please be sure to use it at the rated voltage that specified in the product package or the label.
- ② Lamps should be connected correctly. Keep the connection be firm, reliable and well grounded. Pay attention to keep in the correct position to install lamps.
- ③ All internal wiring must be checked before lighting on the lamp.
- ④ Please cut off the power supply when you maintain or install the lamp. And please confirm that the light source and electrical appliances are correctly installed before you connect the power supply.
- ⑤ Don't install it on the deformed surface.
- ⑥ When the lamp is abnormal, please cut off the power supply and contact the agent or manufacturer immediately.

### 【Installation】

- ① Installation work must be done by qualified electrician.
- ② This lamp can not be used in bad conditions.
- ③ Prohibited to drill at any position of the lamp body.
- ④ After installation, check and confirm no connection short circuit before connecting the power supply.

**A** Turn off the power.

**F** Put the cable through cable gland terminal board like below show.

**B** Open the package and take out the product. Drill  $\Phi$  6mm hole according to the right drawing, and fix the hole spacing.

Model	Power	Fixing Hole Centre
YH15-106T-A	1X10W	330mm
YH15-206T-A	2X10W	
YH15-112T-A	1X18W	840mm
YH15-212T-A	2X18W	
YH15-115T-A	1X24W	1120mm
YH15-215T-A	2X24W	

**G** 1. After wiring, fix metal plate on the housing tighten, then install T8 LED Tubes properly.

**C**  $\Phi$  6mm expansion pipe insert pushed into the wall and fixed ceiling brackets M4 screw.

**D** Install lamp housing on the ceiling brackets.

2. Close the diffuser.

**E** Open metal plate.

**H** Turn on the power.
